

Making Cocktails & Mocktails in Hubble

This page will teach you how to make cocktails and mocktails in Hubble

[Click here](#) to learn more on how to make cocktails & mocktails in Meteor

Cocktail corner

1. Cocktail Recipe Booklet
2. Ice bucket
3. Shot measurers

Instructions

When a cocktail is ordered in Hubble a bartender needs to make it. This is done in the shotcorner directly behind the cash register.

1. Look up the cocktail in the cocktail recipe booklet
2. Follow the instructions for the specified cocktail

Tips

- Almost all cocktails need the jug glass

However, some mocktails are made in a half-liter glass, this is mentioned in the recipe booklet

- The shot measurer, or "barmaatje", is there for you to measure shots. The short side is exactly one shot, the long side is exactly two shots. After using it, throw it in the sink with the shotglasses to clean.
