

Shots (TO DO- add pictures)

Hubble

- In Hubble, all shots come from a bottle, except for Jägermeister, which comes from the Jägermeister draft.
- All shots can be found in the shots corner.

- For all bottled shots, simply pour the shot into a shotglass until it is full. To make the pouring easier, you can use a pouring spout.

- To dispense the Jägermeister, pull the lever on the front of the draft forward. Put a shotglass under the tap and fill it to the edge.

- For tequila, make sure to add a slice of lemon and some salt. The lemon can be placed on top of the shotglas, the salt packet can be placed next to the shot.

Meteor

- In Meteor, part of the shots come from a bottle, others come from the cocktail machine.
- The bottled shots can be found on the platform in the centre of the bar.
- For all bottled shots, simply pour the shot into a shotglass until it is full. To make the pouring easier, you can use a pouring spout.
- To dispense a shot from the cocktail machine, find the item in the machine and first dispense in a shaker or glass, after which you can pour it into a shotglass. If you do not first use a shaker or glass, the shot will splatter itself out of the shotglass and you will not have a full shot.
